WHAT TO **KNOW ABOUT** Should you get in on it? Is it legit? Let's dig

into this mysterious new form of money. Cryptocurrencies like bitcoin, ethereum and dogecoin have emerged in recent years, causing a

whirlwind of confusion. Whether you're a seasoned investor or <mark>just</mark> begin<mark>nin</mark>g to ex<mark>plo</mark>re, this new digital realm can be perplexing.

things you should know

WHAT IS CRYPTOCURRENCY? Cryptocurrency is a digital or virtual form

of currency that uses cryptography for security. It is designed to work as a medium of exchange, just like traditional currencies such as the U.S. dollar, euro

or Japanese yen. Unlike traditional currencies issued and regulated by central banks, cryptocurrencies operate on decentralized networks, typically based on blockchain technology. What does that mean to you? It means that your money is secret. You access your virtual

money (cryptocurrency) through a secure website or app to make transactions. Only you (or whoever has your login password) can access

your cryptocurrency and make transactions. If you lose your private keys, have questions or need any help, you are on your own. There is no banker or help desk that you can call. WHAT IS BITCOIN? Bitcoin is the first and most well-known cryptocurrency. It operates on a peer-to-

be conducted directly between users without the need for intermediaries such as credit unions or banks.

One of the key features of bitcoin is its limited supply. There will only ever be 21 million bitcoins in existence; this scarcity is designed to give it value over time. Bitcoin has gained considerable attention and

peer network, meaning that transactions can
